

ADDITIONS TO INDEX HERBARIORUM

Additions to *Index Herbariorum* (Herbaria), Edition 8—Fifteenth Series

Edited by Patricia K. Holmgren & Noel H. Holmgren

Fifty-one additional herbaria have been called to our attention since the last installment of this series was published in May 2003. Information on these herbaria is presented below in alphabetical order by country. This brings the total number of herbaria added since the publication of Edition 8 to 476.

Information for 3240 herbaria and 9869 people in 165 countries is available for searching by country, institution, city, state, acronym, staff member, correspondent, and research specialty at <http://www.nybg.org/bsci/ih/ih.html>. Telephone and fax numbers as well as e-mail and URL addresses are included. Note that the Index is fully searchable on research specialty, so it also serves as a PLANT SPECIALISTS INDEX.

Aceraceae.

Important collections: A. T. Feodoruk, V. A. Michailovskaya, O. Polyanskaya, M. P. Tomin, I. G. Vasilkov.

Exchange available: Belarus. *Wanted:* Boraginaceae, Salicaceae, Aceraceae, Elaeagnaceae, Liliaceae, and Scrophulariaceae of Europe and North America.
